POWER STROBE® CRANE STATUS LIGHTS

The heavy duty POWER STROBE® makes possible an overhead crane status light suitable for the day-to-day applications of steel mills. The principle of operation is simple and cost effective. The two or three light system needs only one power supply to operate the single strobe head selected. The four light system has two power supplies to operate the blue (magnet) light at the same time as one of the other strobe heads.

If you use short life fragile incandescent status lights - switch to long life vibration resistant POWER STROBE® status lights. The built-in features of the POWER STROBE® anticipates the applications of overhead cranes.

The Model 440 MICROSTACK features multi-color and multi-voltage range of 85-264 VAC 50/60 Hz. They all use the same type format optical signalling using strobes and/or steady burning of lamp and maintain a constant brightness and flash rate over the flashing NEOBE lamps in any combination. NEOBE lamps are in the range. MICROSTACK modules separate at any level by removing two screws. All MICROSTACK modules are sealed with O-rings against dust and can be used outdoors.

MICROLERT STATUS LED LIGHTS

Using the versatile MicroLert LED warning lights, it's possible to assemble a Status Light Assembly suitable for a wide variety of status monitoring applications. The number and location of each MicroLert mounted on the NEMA 3R box from two to five lights. For example if a three light assembly is needed, first select the NEMA 3R box, then the LED MicroLert Lights from left to right and Maxi-Signal will assemble them as specified.

A typical application is the living quarters of an Oil Platform where a MicroLert LED Status Light installed to monitor gas detection equipment. One assembly does it all from a flashing red light to a steady burn green light with other colors in between either flashing or steady burning depending on the conditions monitored.

The MicroLert LED Status Light is actually an "A-La-Carte" monitoring assembly with which the user specifies the model. Example Below: 3 Light LED MicroLert Status Light
